BioBalance® Health Opens New Office

Local Physician Specializes in Bioidentical Hormones for Men and Women

St. Louis physician Dr. Kathy Maupin is delighted to announce the new location of BioBalance Health, in a stunning new building at 10800 Olive Boulevard in Creve Coeur. The practice, which encompasses Maupin's BioBalance 4 Women® and BioBalance 4 Men® services, specializes in bioidentical hormone pellet therapy.

Maupin established BioBalance Health to meet the demands of women and men seeking relief from the effects of aging such as chronic fatigue, migraines, weight-gain, diminished sex drive and sexual dysfunction. BioBalance Health's proprietary, all natural bioidentical hormone pellet therapy alleviates many of these symptoms while delivering a renewed passion for life. In addition, Maupin's holistic approach to wellness and health includes skin care and nutritional therapy. Dr. Maupin also has an office in Kansas City, Missouri, on the Plaza.

BioBalance Pellet therapy is dosed individually for each patient, and before determining the right balance of hormones, patients undergo a blood lab test and a detailed consultation with Dr. Maupin. The medical consultation includes a health history, blood analysis, and diagnosis and management of other endocrine conditions that impact the results of treatment. Next during a brief in-office procedure using topical anesthetic, the pellets, testosterone and estradiol, made of soy and yam extracts, are inserted under the skin in the hip area in women and the "love handle" area in men. Most patients enjoy the results for three to six months.

For Maupin, helping women and men renew their passion for life as they age isn't just a professional desire, it's a personal quest. After undergoing a hysterectomy at age 47, Dr. Maupin's life spiraled downward as she battled chronic fatigue, depression, migraines and weight gain. On the verge of giving up her practice, she found the answer that she says "saved her life" – bioidentical hormone pellet therapy. Within hours of her first treatment, Dr. Maupin felt noticeably better, and the results only grew more dramatic from there.

Patients from around the world, including Australia, Germany and Japan, come to St. Louis for the hormone pellet therapy, and both men and women consistently thank Dr. Maupin for 'giving me my life back.'

The practice is currently accepting new patients.
