Dr. Ed. Lee developed NEO 40, a formula that increases your Nitric Oxide (NO) levels –you know, the natural chemical that improves erections (you may not need Viagra any more), increases orgasms in women, dissolves plaque in your arteries and dilates your arteries to improve blood flow, and lowers blood pressure throughout your body!

Dr. Lee has dedicated 7 years of his life to developing this supplement....you chew it 1-2 times a day and voila! Your body, with the help of your testosterone pellets, is back to your thirties!

BioBalance is stocking this revolutionary supplement. 60 tablets is \$ 99.95, and cannot be obtained anywhere other than a doctor's office!
